

Reference List:

Below you find a table containing an overview of a number of venues that are using ACS. It is in alphabetical order sorted on city name. (Unless it is a mobile installation)

5 types of systems (units) are mentioned, being:

- D-series: The latest ACS system type, applicable for almost any situation
- Standard: The former ACS standard system, for larger halls (typically 500+ seats)
- Compact: The ACS Compact system, for smaller halls and churches
- AC-series: The predecessor of the standard system
- C-AC-series: The predecessor of the Compact system

Please refer to our further documentation for more information on the system modules

Note: Many of our systems are equipped with the option to use microphones, amplifiers and loudspeakers for other purposes. This is not mentioned in the tables.

City Country Name Hall type	Number of Seats	System modules and type	Number of microphones, loudspeakers used (and particulars)
